

PPMO Bid Response File Downloader

User Manual & Getting Started Guide

Welcome to the PPMO Bid Response File Downloader! This powerful tool automates the process of extracting and downloading PDF files directly from PPMO Bid response documents, saving you hours of manual work.

1. Getting Started

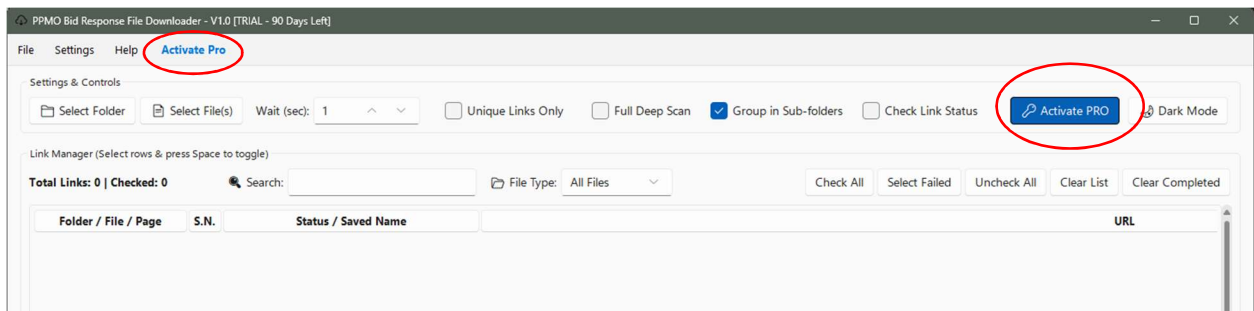

Installation

1. Run the PPMO_Bid_Response_FD_Setup.exe file.
2. Follow the on-screen prompts to install the application.
3. Open the application from your Desktop or Start Menu.

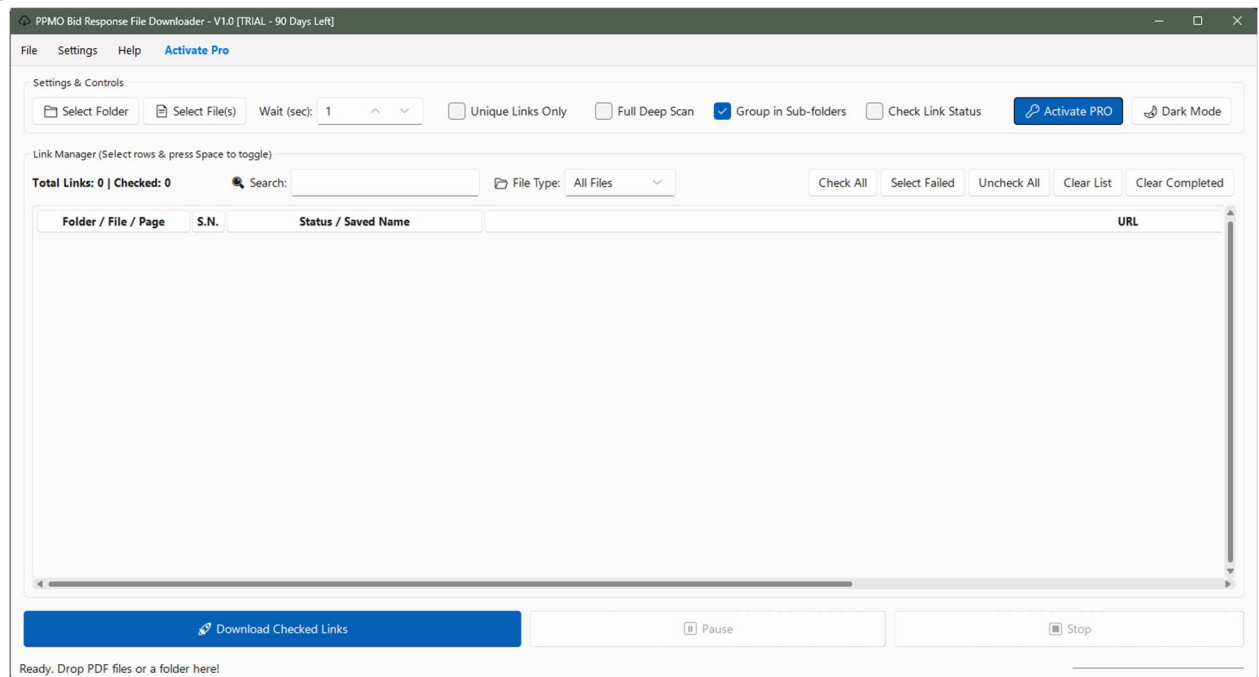

Trial Mode vs. PRO Version

When you first install the software, it will operate in **Trial Mode**, which allows you to evaluate the software with all the features for **90 days**.

- **After Trial Mode 90 Days:** You can only process 1 PDF file at a time, and folder scanning is disabled.
- **Upgrading to PRO:** To unlock unlimited batch processing and folder scanning, click the  **Activate PRO** button in the top right corner or the top menu of the application.

2. Using the Main Interface

Top Menu Bar

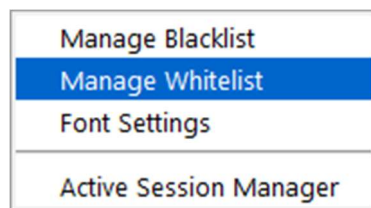

At the very top of the application, you will find three main menus:

❖ File Menu

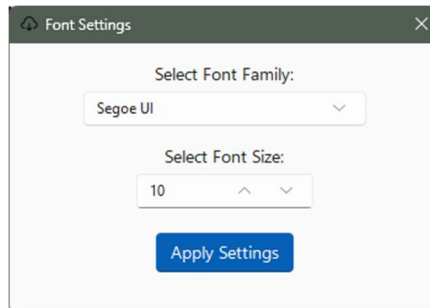

Select File(s)...	Ctrl+O
Select Folder...	Ctrl+Shift+O
Clear Completed Links	
Export Links to Excel/CSV...	
History	
Exit	

- **Select File(s)... (Ctrl+O):** Pick one or more PDF documents to load.
- **Select Folder... (Ctrl+Shift+O):** Select a folder and the software will scan every PDF inside it.
- **Clear Completed Links:** Removes all successfully downloaded files from the grid to reduce clutter.
- **Export Links to Excel/CSV...:** Saves your current session list to an Excel-compatible spreadsheet.
- **History:** Opens the Vault to see every file you've ever successfully downloaded.
- **Exit:** Closes the application safely.

❖ Settings Menu

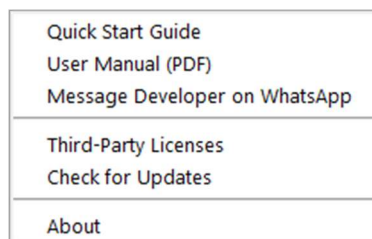

- **Manage Blacklist:** View and edit domains or exact links that the software should ignore.
- **Manage Whitelist:** View and edit domains that the software should always prioritize.
- **Font Settings:** Change the font size and font family to make reading easier.

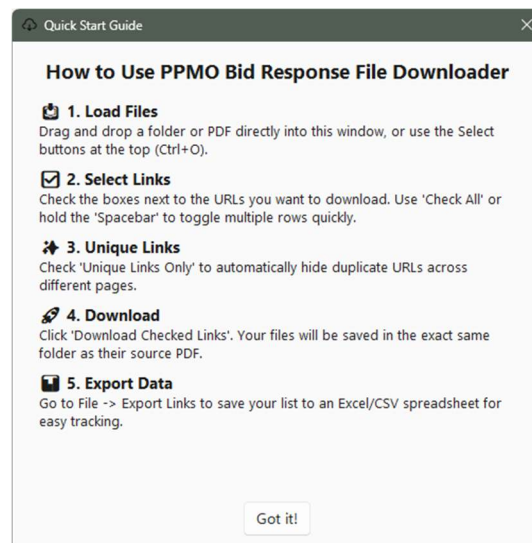

- **Active Session Manager:** Some government portals or secure websites require you to be logged in before you can download their bid response files. The Active Session Manager solves this by automatically importing your active session cookies directly from your web browser (Firefox, Chrome, Edge, etc.). This ensures the downloader has the proper authorization to bypass login screens and successfully grab the files.

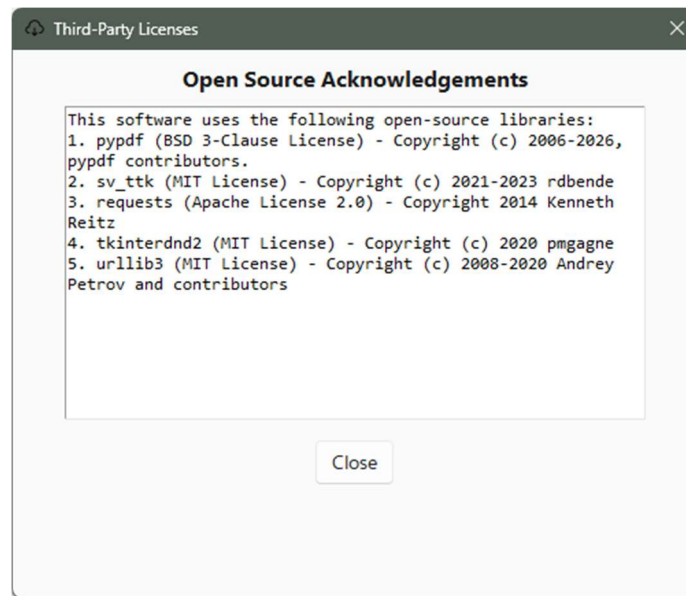

❖ Help Menu

- **Quick Start Guide:** Opens a brief in-app guide on how to use the software.

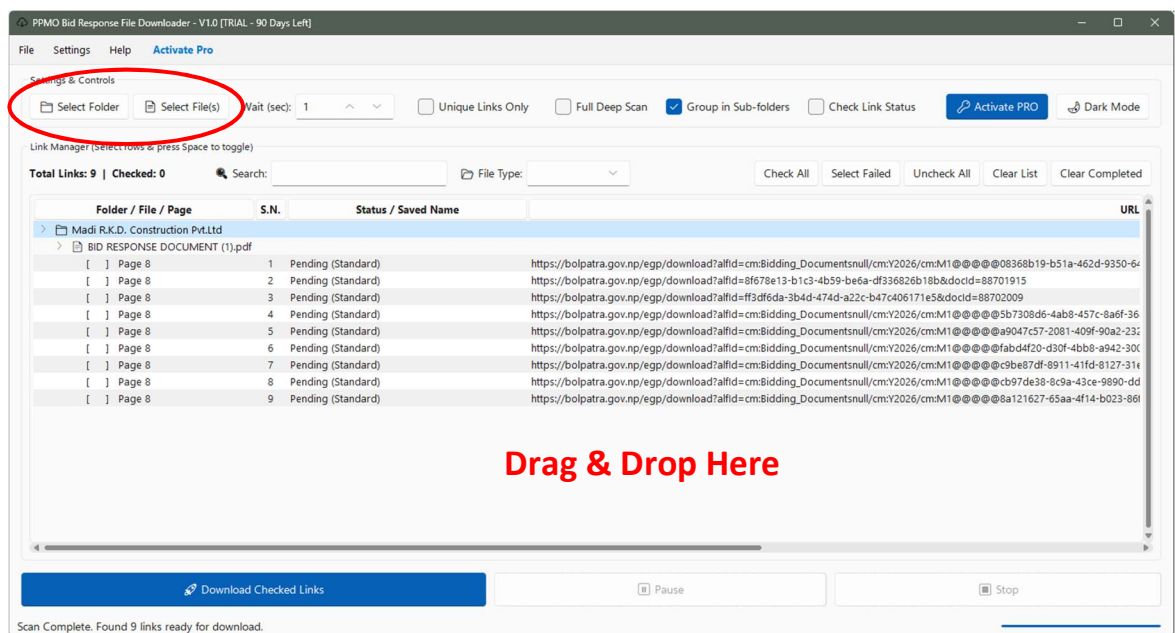

- **User Manual (PDF):** Opens this comprehensive PDF document.
- **Third-Party Licenses:** Displays the open-source software licenses used in this application.

- **Check for Updates:** Opens the release page to check if a new version of the software is available.
- **About:** Displays information about the software version and developer.

Loading Files

You can load files into the software via the **File** menu, the quick buttons, or by drag-and-drop:

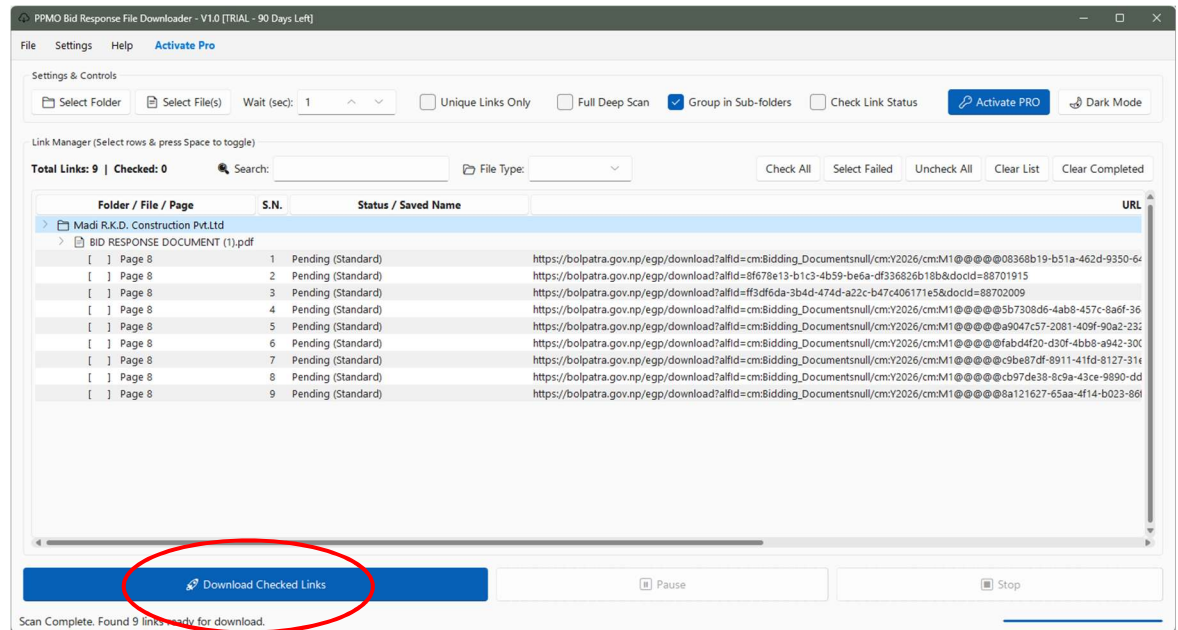

- **Select File(s):** Pick one or more bid response pdf documents.
- **Select Folder:** Select a folder and the software will scan every PDF inside it.

- **Drag and Drop:** Simply drag files directly onto the main application window.

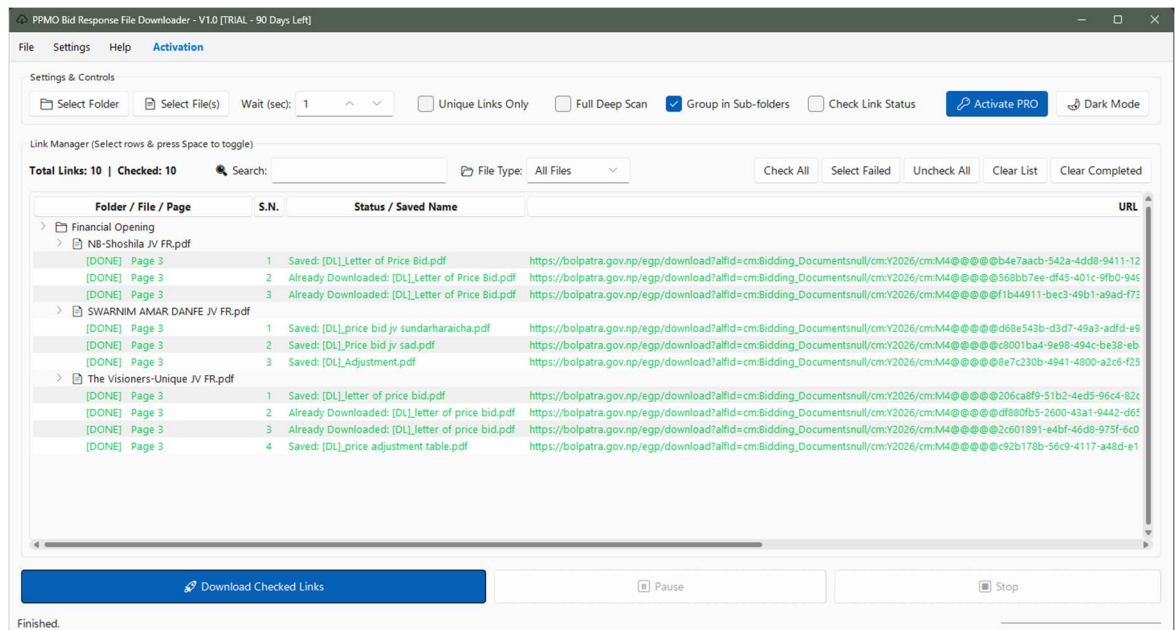

Scanning and Downloading

1. After loading the pdfs into the main application window, the program will automatically scanned the loaded pdfs and show the links on the main application window.
2. Click **Download Checked Links** to download the files of scan loaded PDFs.

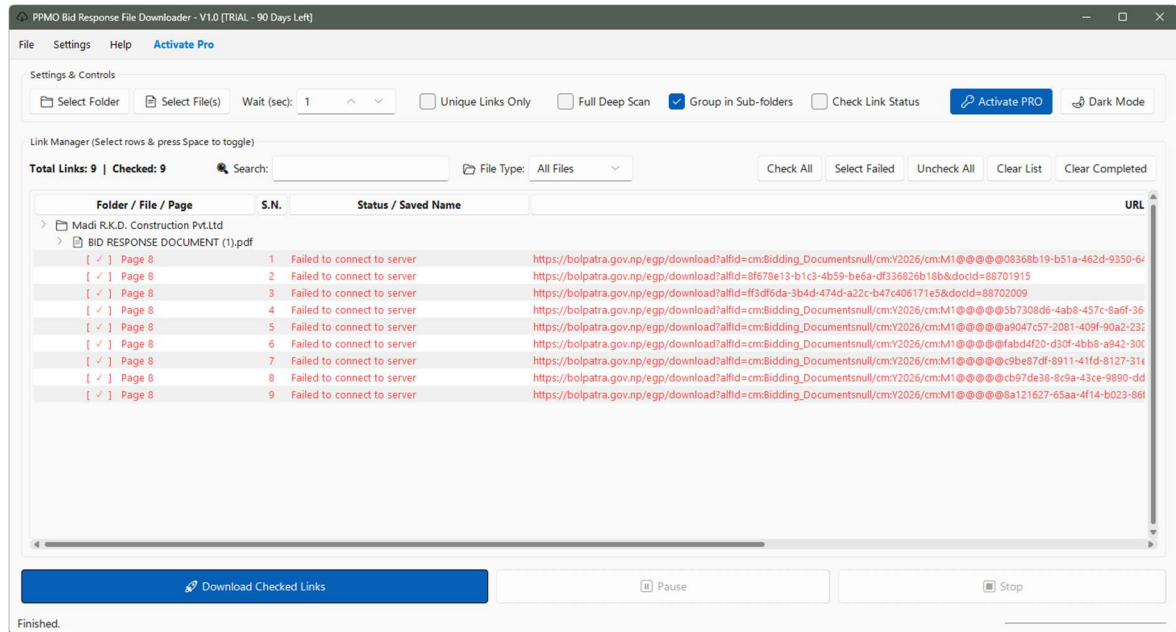

3. The grid will update in real-time.

- **Green Text:** Successful downloads.

- **Red Text:** Failed downloads or dead links.

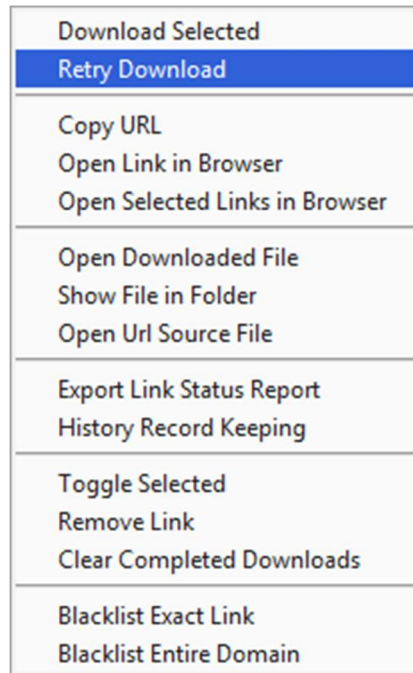

Bulk Actions & Filtering

Located at the top of the list viewer, these tools help manage large lists:

- **Check All :** Quickly check all links (like Select All).
- **Select Failed:** Automatically selects only the links that failed to download.
- **UnCheck All :** Quickly uncheck all links (like Deselect All).
- **Clear List:** Completely empties the current session.
- **Clear Completed:** Removes all successful downloads from the list to reduce clutter.
- **Filter Dropdown / Search:** Type in the search box to find specific links, or use the dropdown to only show All Files, .pdf, .zip, .xlsx, .docx, .dwg, .csv

3. Advanced Features

Right-Click Context Menu

Right-click any item in the grid to access a powerful set of tools to manage your links and files:

- **Download Selected:** Manually start the download for the currently highlighted link(s).
- **Retry Download:** Re-attempt a download if it previously failed or timed out.
- **Copy URL:** Copies the exact web link to your clipboard.
- **Open Link in Browser:** Opens the selected link in your default web browser (like Firefox, Chrome or Edge).
- **Open Selected Links in Browser:** Opens multiple highlighted links in your browser simultaneously.
- **Open Downloaded File:** Instantly open the PDF file if it has successfully downloaded.
- **Show File in Folder:** Opens Windows Explorer and highlights the downloaded file.
- **Open Url Source File:** Opens the original, parent PDF document where this link was discovered.
- **Export Link Status Report:** Saves your current session grid to a CSV/Excel file for your records.
- **History:** Opens the Vault to see every file you've ever successfully downloaded.
- **Toggle Selected:** Check or uncheck the highlighted row(s).
- **Remove Link:** Deletes the selected link from the current session view (does not delete the actual file).
- **Clear Completed Downloads:** Hides all successful (green) downloads to help you focus on remaining or failed links.
- **Blacklist Exact Link:** Adds this specific URL to your blacklist so it is never scanned or downloaded again.
- **Blacklist Entire Domain:** Blocks all links from this website (e.g., blocking an entire advertising network or generic portal).

Theme

- **Theme:** Switch between Light and Dark mode.

History

Under the **File** menu, you can access the **History Vault**. The software silently logs every successful download. In the History Vault, you can view, search, and export a master record of every file you have ever downloaded.

Active Session Manager

If you close the application with a list of links still loaded, the Active Session Manager remembers them. When you reopen the app, your previous session is fully restored!

Blacklist & Domain Filtering

To prevent downloading useless links (like generic Adobe Acrobat links or standard government portal homepages), the software utilizes a smart **Blacklist**. Links matching these rules are silently ignored during the scanning phase, ensuring your list is only populated with actual Bid Response documents.

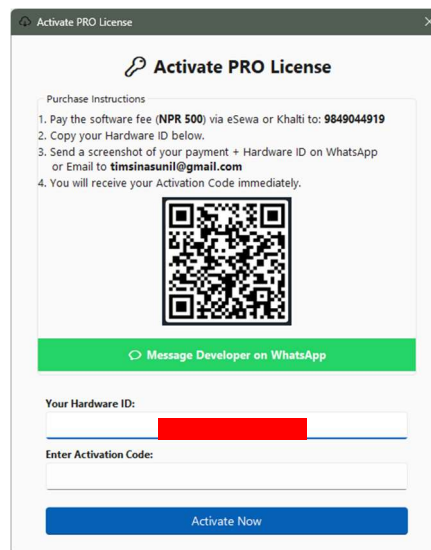

Deep Scan Mode

By default, the software looks for official PDF embedded hyperlinks. If you suspect links are missing, check the "**Deep Scan**" box. The scanner will read the raw text of the document to find hidden or un-clickable web addresses.

4. Activation (Unlocking PRO)

If your trial expires or you wish to process multiple files at once, you will need an Activation Code.

1. Click **Activate PRO** in the app menu.
2. You will see a unique **Hardware ID** (e.g., XXXXXXXX like 02D22548).

3. Copy this Hardware ID and send it to the developer along with your payment screenshot (via WhatsApp or Email).
4. You will receive an **Activation Code**.
5. Paste the Activation Code into the box and click **Activate Now**.
6. Restart the application to enjoy permanent PRO features!

5. Troubleshooting (Help Menu)

- **Error: "Invalid Password"** If a PDF is password-protected, a popup will ask you for the password. If entered incorrectly, the file is skipped.
- **Error: "Failed to connect to server"** Check your internet connection. Some government servers block requests during maintenance periods.
- **Support:** Use the **Message Developer on WhatsApp button in Help Menu** for direct assistance.
